

# **INNOVATION. INNOVATION. INNOVATION**

Re-imagining the world, through the lens of accessibility

A call to Action: Creating a more inclusive accessible world

A world that's truly fair, where disability doesn't impair

Innovation paves the way, we can be better for it every day

Inclusion is not a need, but a right indeed

Disability shouldn't be a career, where innovation can break the barriers

Disability is no longer a tether, because creativity can bring us together

Disability no longer stings, technology gives them wings

When minds and hearts create, disability becomes an innate

The power of determination, overcoming obstacles, achieving greatness

Embracing diversity, seeing beyond disability

Inclusion no longer a dream, with innovation as it's gleam

Assistive technologies, opening doors to possibilities

From ramps to hearing aids, disability no longer sounds

From Braille to sign language, adjustable beds to wheel chairs

Reduction on the taxes imposed on the gadgets, innovation is on the rampage.

Reminder of our invisibility!!!!
